

Robinson Arce Molina studied Biochemistry in the Universidad Austral de Chile. At the end of year 2013 he finished his undergraduate thesis in Dr. Alejandro Reyes's laboratory, working with facilitative membrane transporters. In 2014 he enters to the Doctorado en Ciencias Mención Biología Celular y Molecular in the same University. In 2015 starts working on CECs as investigation assistant, in Dr. Felipe Barros's laboratory, working in the development of nanosensors using molecular biology. The next year, he starts his PhD thesis in the same laboratory, using nanosensors to study cellular metabolism with high temporal and spatial resolution.
